RE: Submission of the Goose Lake Coalition's Lassen Creek Management Plan for *Ceriodaphnia dubia* Toxicity

Dear Ms. Creedon,

Enclosed with this letter is the Goose Lake Coalition's Lassen Creek Management Plan for *Ceriodaphnia dubia* Toxicity. Prepared by the Goose Lake Resource Conservation District (GLRCD) on behalf of the Coalition, the plan describes the study design that will be implemented throughout the 2008 monitoring season to determine the source or cause of the *C. dubia* toxicity detected in Lassen Creek during 2007.

We greatly appreciate the assistance of CVRWQCB staff in working with us to develop this management plan and in continuing to conduct our monitoring program. We are also currently working closely with the staff to revise our Monitoring and Reporting Program Plan (MRPP) for 2009 and subsequent years in order to meet the 25 July 2008 deadline described in Board Order No. R5-2008-0005. Except for the modifications approved by the Board on 9 April 2008 and 6 June 2008, the Goose Lake Coalition will continue to comply with Board Order R5-2005-0833 until the revised MRPP is submitted and approved.

For additional information about the attached plan or the Goose Lake Coalition in general, please feel free to contact Herb Jasper, Coalition Lead and GLRCD Project Director at (530) 946-4196, or Julie Laird, GLRCD Project Manager, at (541) 947-3868.

Sincerely,

Herb Jasper  
Goose Lake Coalition Lead  
GLRCD Project Director

Julie Laird  
GLRCD Project Manager
